A little script driven two stage dialog with zenity On Solaris and Linux there is a little utility called zenity which displays a dialog window. It has various options from simply displaying a string to showing a file dialog progress.

A little script driven two stage dialog with zenity

If by "login" you mean "graphical login" (which is reasonable since zenity is Gtk+ based), then one could put the test in `~/.xinitrc` (or equivalent depending on window/login manager) without sending it to the background before the window manager is started. This would halt the process until the test has returned.

Is there a way to make a zenity dialog modal? - Super User

If admins have SSH, sudo, and one of the dialog systems described below (Zenity, Yadda, KDialog, or Rex) in their tool boxes, the client users don't have to grapple with Linux concepts. Windows clients have PuTTY, WinSCP, or PowerShell.
