Because noise is a probability function, designers need to add uncorrelated noise sources in root-sum-square fashion (rss). This means that adding two noise sources having the

Low Noise Signal Conditioning for Sensor-Based Circuits

A low-noise block downconverter (LNB) is the receiving device mounted on satellite dishes used for satellite TV reception, which collects the radio waves from the dish and converts them to a signal which is sent through a cable to the receiver inside the building. Also called a low-noise block, low-noise converter (LNC), or even low-noise downconverter (LND), the device is sometimes ...
