Nucleic acids, macromolecules made out of units called nucleotides, come in two naturally occurring varieties: deoxyribonucleic acid (DNA) and ribonucleic acid (RNA). DNA is the genetic material found in living organisms, all the way from single-celled bacteria to multicellular mammals like you and me.

Exploring baking powder What are the active ingredients in baking powder? In Activity 5.2 Using chemical change to identify and unknown baking powder was the only substance that reacted with water to produce a gas. Baking powder is not just a single substance. It is a combination of substances that, when mixed with water, react to release carbon dioxide gas.
