Advanced Linux Sound Architecture (ALSA) is a software framework and part of the Linux kernel that provides an application programming interface (API) for sound card device drivers.. Some of the goals of the ALSA project at its inception were automatic configuration of sound-card hardware and graceful handling of multiple sound devices in a system.

Advanced Linux Sound Architecture - Wikipedia

The purpose of this Request for Information (RFI) is to solicit feedback from utilities (investor-owned, municipal, and electric cooperative), the solar industry, academia, research laboratories, government agencies, and other stakeholders on issues related to the net valuation of solar photovoltaics (PV) and innovative cost-effective distributed solar PV deployment models.

The 5AT Advanced Technology steam locomotive is a conceptual design conceived by the British engineer David Wardale, and first described in his definitive work on modern steam, *The Red Devil and Other Tales from the Age of Steam*. Wardale's purpose in putting forward the "Super Class 5 4-6-0" design concept (as he then called it) was to offer a future for steam hauled trains on the main lines ...

Using the policy driven data center approach, networking professionals can make their data center topologies faster to configure and more portable They can also build cloud infrastructure faster than before. All of this can be achieved by using REST and python together with the latest Cisco technology called Application Centric Infrastructure (ACI).
