Thyroid autoantibodies are antibodies that develop when a person's immune system mistakenly targets components of the thyroid gland or thyroid proteins, leading to chronic inflammation of the thyroid (thyroiditis), tissue damage, and/or disruption of thyroid function. Laboratory tests detect the presence and measure the quantity of specific thyroid autoantibodies in the blood.

Laboratory Procedures Serological detection of avian influenza A(H7N9) infections by microneutralization assay 23 May 2013 . The WHO Collaborating Center for Reference and Research on Influenza at the

Laboratory Procedures Serological detection of avian

Monoclonal antibodies (mAb or moAb) are antibodies that are made by identical immune cells that are all clones of a unique parent cell. Monoclonal antibodies can have monovalent affinity, in that they bind to the same epitope (the part of an antigen that is recognized by the antibody). In contrast, polyclonal antibodies bind to multiple epitopes and are usually made by several different plasma ...

Monoclonal antibody - Wikipedia

Anti-cardiolipin antibodies (ACA) are antibodies often directed against cardiolipin and found in several diseases, including syphilis, antiphospholipid syndrome, livedoid vasculitis, vertebrobasilar insufficiency, Behçet's syndrome, idiopathic spontaneous abortion, and systemic lupus erythematosus (SLE). They are a form of anti-mitochondrial antibody. In SLE, anti-DNA antibodies and anti ...

Anti-cardiolipin antibodies - Wikipedia

Antiphospholipid antibodies are autoantibodies that increase the risk of blood clots. Blood tests detect these autoantibodies to help determine the cause of blood clots, miscarriages, low platelets, or prolonged PTT.
