

### **applied spatial statistics in pdf**

Statistics is a branch of mathematics dealing with data collection, organization, analysis, interpretation and presentation. In applying statistics to, for example, a scientific, industrial, or social problem, it is conventional to begin with a statistical population or a statistical model process to be studied. Populations can be diverse topics such as "all people living in a country" or ...

Interpolation should not be used when there isn't a meaningful value of the variable at every point in space (within the region of interest); That is, when points represent merely the presence of events (e.g., crime), people, or some physical phenomenon (e.g., volcanoes, buildings), interpolation does not make sense
