Addition (often signified by the plus symbol "+") is one of the four basic operations of arithmetic; the others are subtraction, multiplication and division. The addition of two whole numbers is the total amount of those values combined. For example, in the adjacent picture, there is a combination of three apples and two apples together, making a total of five apples.

Memory is the ability of the mind to store and recall information that was previously acquired. Memory is processed through three fundamental processing stages: storage, encoding, and retrieval. Storing refers to the process of placing newly acquired information into memory, which is modified in the brain for easier storage.
