

basic physiology for anaesthetists pdf

Elsevier's Anaesthesia and Intensive Care Medicine is a continually updated, evidence-based, learning resource for trainees. Mapped to the curriculum of both the Primary and Final Fellowship of the Royal College of Anaesthetists (FRCA) examinations, Anaesthesia and Intensive Care Medicine gives you high calibre and concise articles designed to help you pass the FRCA exams.

Anaesthesia and Intensive Care Medicine

Intraoperative neurophysiological monitoring (IONM) or intraoperative neuromonitoring is the use of electrophysiological methods such as electroencephalography (EEG), electromyography (EMG), and evoked potentials to monitor the functional integrity of certain neural structures (e.g., nerves, spinal cord and parts of the brain) during surgery. The purpose of IONM is to reduce the risk to the ...

Intraoperative neurophysiological monitoring - Wikipedia

General anaesthetics (or anesthetics, see spelling differences) are often defined as compounds that induce a reversible loss of consciousness in humans or loss of righting reflex in animals. Clinical definitions are also extended to include the lack of awareness to painful stimuli, sufficient to facilitate surgical applications in clinical and veterinary practice.

Summary. Sexual harassment of women in medicine has become a subject of national debate after a senior female surgeon stated that if a woman complained of unwanted advances her career would be jeopardised, and subsequent reports suggest that sexual harassment is a serious problem in the medical profession.

Sexual harassment in the medical profession: legal and

Upper urinary tract stones are a common problem in Australia, with an incidence of 0.13% per year, and a lifetime prevalence of up to 15% in males and 8% in females. Many of these patients first present to general practitioners (GPs), so a thorough understanding of the diagnosis, treatment and prevention of stone disease is an important part of any GP's arsenal. | RACGP
