Microbiology & Infectious Diseases Flashcards, Third

The American Society for Microbiology (ASM) is the oldest and largest single life science membership organization in the world. Membership has grown from 59 scientists in 1899 to more than 39,000 members today, with more than one third located outside the United States. The members represent 26 disciplines of microbiological specialization plus a division for microbiology educators.

Next generation sequencing makes it possible to standardise methods. Next generation sequencing has a large number of applications in clinical microbiology.

Application of next generation sequencing in clinical

Simplicity throughout: The DR3900 spectrophotometer provides the simplest way to perform tests for water analysis. Used together with TNTplus test kits testing steps are reduced.

DR3900 Laboratory VIS Spectrophotometer with RFID

The 1978 smallpox outbreak in the United Kingdom resulted in the death of Janet Parker, a British medical photographer, who became the last recorded person to die from smallpox. Her illness and death, which was connected to the deaths of two other people, led to an official government inquiry and triggered radical changes in how dangerous pathogens were studied in the UK.

An official journal of the Infectious Diseases Society of America. Publishes on clinical descriptions of infections, public health, microbiology, and immunology

Clinical Infectious Diseases | Oxford Academic

Bubonic plague is an infection of the lymphatic system, usually resulting from the bite of an infected flea, *Xenopsylla cheopis* (the rat flea). In very rare circumstances, as in the septicemic plague, the disease can be transmitted by direct contact with infected tissue or exposure to the cough of another human. The flea is parasitic on house and field rats, and seeks out other prey when its ...
