Author: Grzegorz Goli. SAP Business Objects and IBM Cognos comparison. The high and extremely significant growth of demand on information delivery in the enterprises caused that the companies offering business intelligence solutions live their best years.

SAP Business Objects vs IBM Cognos - Business intelligence

Assessing business intelligence tools means first answering the question, "What is business intelligence?" Business Intelligence, usually referred to as "BI" for short, refers to software designed to analyze data with the goal of discovering useful business insights.

Best Business Intelligence (BI) Tools: A Comparison of BI

Data is the most abundant and precious resource in an enterprise. It comes in all forms and is complex to merge, relate and analyze. Data analytics extract meaning from that data for business gain or productivity, often sharing those insights through analytics dashboards or analytics reports.
