Chirality / k aÉª È^ r Ã! l Éª t i / is a geometric property of some molecules and ions. A chiral molecule/ion is non-superposable on its mirror image.The presence of an asymmetric carbon center is one of several structural features that induce chirality in organic and inorganic molecules. The term chirality is derived from the Ancient Greek word for hand, ἡ χείρ (kheir).

Chirality (chemistry) - Wikipedia

In chemistry residue is whatever remains or acts as a contaminant after a given class of events.. Residue may be the material remaining after a process of preparation, separation, or purification, such as distillation, evaporation, or filtration.It may also denote the undesired by-products of a chemical reaction

Organic Chemistry Visually in 24 Hours - Organic Chemistry

Overview of JBC's publication process. For initial submission, authors should prepare their manuscript as a single PDF file. At this stage, the primary goal is for the manuscript to contain the necessary information to enable a full scientific assessment, so while all sections of the manuscript need to be present, references need to be complete, and figures and tables need to be clearly ...

Instructions for Authors - jbc.org

Management Tips. All chemistry teachers should start the year by having students and parents/guardians sign a Student Safety Contract. I used this Flinn safety contract.; Show this "Lab Safety" video (requires Windows Media Player 10 or above) that was provided by Renee Diamond of the NSTA Listserve. The music in the video is from a band called "rhythm, rhyme, results."
