PolyTHF: For highly elastic spandex fibers. As a highly elastic synthetic fiber, spandex, or elastane, is currently a very popular textile material. The advantage of spandex is its elasticity, making spandex-containing clothes very comfortable to wear. Besides clothing, spandex is being gradually applied in the medical and other industries.

A carbanion is an anion in which carbon is trivalent (forms three bonds) and bears a formal negative charge in at least one significant mesomeric contributor (resonance form). Absent  $\pi$  delocalization, carbanions assume a trigonal pyramidal, bent, or linear geometry when the carbanionic carbon is bound to three (e.g., methyl anion), two (e.g., phenyl anion), or one (e.g., acetylide anion ...

K<sup>+</sup> sensing: A light-addressable electrochemical K<sup>+</sup> sensor is introduced that consists of a thin polymer film containing an ionophore deposited on a semiconducting silicon electrode. Ferrocene is covalently attached to oxide-free silicon and the electrode exhibits surface confined electrochemistry under light illumination.

Going for gold: The mono- and di-chloroform solvates of [Au<sub>2</sub>( $\mu$ -1,2-bis(diphenylarsino)ethane)<sub>2</sub>](AsF<sub>6</sub>)<sub>2</sub> undergo single-crystal-to-single-crystal transformations that result in gain or loss of only one chloroform molecule and changes in the structure and luminescence of the digold cation.

In organic chemistry, an alkene is an unsaturated hydrocarbon that contains at least one carbon-carbon double bond. The words alkene and olefin are often used interchangeably (see nomenclature section below). Acyclic alkenes, with only one double bond and no other functional groups, known as mono-enes, form a homologous series of hydrocarbons with the general formula  $C_n H_{2n}$ .

A discussion main models on the spontaneous origin of life that aims to show how cellular complexity could have gradually emerged from simple systems – in contrast to the sudden appearance of complexity that creationists claim to have been necessary at the beginning of life. Central issues like the composition of the early atmosphere of the Earth and the origin of the homochirality of amino ...
