Author: Denise R. Eccles, PhD, ED, RN Advance Nursing Institute INC is approved as a provider of continuing education in nursing by Florida Board of Nursing.

Communicating with the Cognitively Impaired Patient Objectives

Short term memory is the ability to keep information in mind for a short amount of time. Remembering a phone number long enough to find a piece of paper is an example. The brain keeps information in its short term memory for a small period of time. The amount of time the mind is able to do this is usually some seconds.

Short-term memory - Simple English Wikipedia, the free

In semantic priming, the prime and the target are from the same semantic category and share features. For example, the word dog is a semantic prime for wolf, because the two are similar animals. Semantic priming is theorized to work because of spreading activation within associative networks. When a person thinks of one item in a category, similar items are stimulated by the brain.

Priming (psychology) - Wikipedia

The fight-or-flight response (also called hyperarousal, or the acute stress response) is a physiological reaction that occurs in response to a perceived harmful event, attack, or threat to survival. It was first described by Walter Bradford Cannon. His theory states that animals react to threats with a general discharge of the sympathetic nervous system, preparing the animal for fighting or ...

Open-plan offices are equipped with barriers such as panels and bookshelves to induce the perception of a

private workspace. Despite perceived privacy, irrelevant speech contributes to mental workload, poor performance, stress, and fatigue.
