Eating live animals is the practice of humans eating animals that are still alive. It is a traditional practice in many Asian food cultures. Eating live animals, or parts of live animals, may be unlawful in certain jurisdictions under animal cruelty laws. Religious prohibitions on the eating of live animals by humans are also present in various world religions.

The question of whether it is right to eat animal flesh is among the most prominent topics in food ethics. The most commonly given moral objection to meat-eating is that, for most people living in the developed world, it is not necessary for survival or health; some argue that slaughtering animals solely because people enjoy the taste of meat is wrong and morally unjustifiable.

A parasite is an organism that lives on or in a host and gets its food from or at the expense of its host. Parasites can cause disease in humans. Some parasitic diseases are easily treated and some are not. The burden of these diseases often rests on communities in the tropics and subtropics, but parasitic infections also affect people in developed countries.

Escherichia coli (E. coli) bacteria normally live in the intestines of people and animals. Most E. coli are harmless and actually are an important part of a healthy human intestinal tract. However, some E. coli are pathogenic, meaning they can cause illness, either diarrhea or illness outside of the intestinal tract. The types of E. coli that can cause diarrhea can be transmitted through ...
