Electromagnetic or magnetic induction is the production of an electromotive force (i.e., voltage) across an electrical conductor in a changing magnetic field.. Michael Faraday is generally credited with the discovery of induction in 1831, and James Clerk Maxwell mathematically described it as Faraday's law of induction. Lenz's law describes the direction of the induced field.

### **Electromagnetic induction - Wikipedia**

Vector control, also called field-oriented control (FOC), is a variable-frequency drive (VFD) control method in which the stator currents of a three-phase AC electric motor are identified as two orthogonal components that can be visualized with a vector. One component defines the magnetic flux of the motor, the other the torque. The control system of the drive calculates the corresponding ...

Eyeless In Gaza new album Winter Sang out November 15th, 2018 (November 17th 2018) The new Eyeless In Gaza album – Winter Sang – is finally here! It is available for pre-order right now and will reach us for delivery on the 14th of November.

### **Eyeless In Gaza – The Official Homepage**

Note: If you are not at all familiar with basic electronics, you might find it easier to understand this chapter if you read chapter 12 first. The pulsed devices mentioned so far have had moving parts but rotating or fluctuating magnetic fields can be created without moving parts.

### **Chapter 3 - Motionless Pulsed Systems**

Prologue "Try to touch the past. Try to deal with the past. It's not real. It's just a dream." – Ted Bundy It didn't start out here. Not with the scramblers or Rorschach, not with Big Ben or Theseus or the vampires. Most people would say it started with the Fireflies, but they'd be wrong.

Many have tried building a free energy-producing magnetic motor. I am seeing a lot in my daily quest through alternative energy news, but what I have learned is that energy is not free, perpetual motion machines do not exist, everything is taken from somewhere and put elsewhere.

### How to Build a Free Energy Magnetic Motor - The Green

\* Global warming is defined by the American Heritage Dictionary of Science as "an increase in the average temperature of the Earth's atmosphere, either by human industry and agriculture or by natural causes like the Earth has experienced numerous times through its history."
