### **Rules of Exponents & Guided Notes Section 5**

1 Guided Notes for lesson P.2 & Properties of Exponents If  $a, b, x, y$  and  $a, b, z \neq 0$ , and  $m, n \in \mathbb{Z}$  then the following properties hold: 1. Negative Exponent Rule:  $a^{-n} = \frac{1}{a^n}$  and  $\frac{1}{a^{-n}} = a^n$  Answers must never contain negative exponents.

### **Guided Notes for lesson P.2 Properties of Exponents**

- Fraction Exponents Guided Notes FRACTION EXPONENTS GUIDED NOTES pdf this is the book you are looking for from the many other titles of Fraction Exponents Guided

### **Fraction Exponents Guided Notes [Epub]**

At the end of the Guided Notes, students compare the two methods of using The Quotient Rule Of Exponents, and dividing like factors to one. In both methods students use the fraction bar to divide the numbers, or reduce the factors, and then simplify the variables by either subtracting the exponents, or expand to divide like factors.

### **Guided Notes-Quotient rule.pdf - BetterLesson**

In most of the Guided Notes I emphasize the vocabulary of rational exponents for students to be able to rewrite expressions between radical and rational exponent form. In the last section I present to students how to write as a single rational exponent by finding a common denominator for the exponents and then simplifying.

### **Guided Notes-Rational Exponents.pdf - BetterLesson**

Unit 1 Exponents and Radicals Guided Notes ... In order to make our lives easier, we are going to assume that fractional exponents (known as rational exponents) follow the same properties as integer exponents like the ones above. ...

### **Unit 1: Exponents and Radicals Guided Notes**

Rules of Exponents Guided Notes Algebra Standards: N.RN.1. Rules of Exponents N.RN.1 | CAN'T rewrite expressions involving rational exponents using the properties of exponents. Vocabulary: Monomial A number, a variable, or a product of a number and one or more variables

### **Rules of Exponents Guided Notes - Paulding County School**

Simplifying Radicals Notes Often when we have a radical expression, we need to simplify it. A radical is in simplified form if it ... Use the definition of fractional exponents to rewrite the radical expression in exponential form. 1. By our definition, we can rewrite this as:

### **Simplifying Radicals Notes - hoffman**

QUOTIENT RULE: To divide when two bases are the same, write the base and SUBTRACT the exponents. Examples: A.  $B^5 \div B^2 = B^3$  C.  $\frac{B^5}{B^2} = B^3$  3. ZERO EXPONENT RULE: Any base (except 0) raised to the zero power is equal to one.  $B^0 = 1$  Examples: A.  $B^5 \div B^5 = B^0 = 1$  B.  $\frac{B^5}{B^5} = B^0 = 1$  C.  $\frac{B^5}{B^5} = 1$  4. POWER RULE: To raise a power to another power, write the base and MULTIPLY the exponents.

## EXPONENT RULES & PRACTICE

Zero Exponent Rule: Anything with an exponent of zero should be changed to a 1  
Negative Exponent Rule: Move ONLY the variable that the exponent is attached to.

Rewrite rational exponents using radicals. Use the properties of exponents to simplify radical expressions and expressions with rational exponents. Warm Up:  $6 \cdot 0.64 \cdot 65 \cdot 5 \cdot 253 \cdot 5 \cdot (2 \cdot 32)^5 \cdot 3 \cdot 2^4$  Rational Exponents: Radicals can be rewritten using rational (fraction) exponents. The properties of exponents can then be used to simplify expressions.

### 4.5 Guided Notes Sec 2 Rational Exponents U4

These are Guided Notes designed to teach students to understand and apply the Rules of Exponents. For each rule, the notes list the rule, give a verbal description of how to apply it, and take the students through 2-4 examples.

### Exponents Guided Notes Teaching Resources | Teachers Pay

Sometimes fractional exponents are used to represent power of numbers or variables. The numerator of the fraction (m) represents the power, the denominator (n) represents the root. The exponent in the denominator must always be positive.
