Title Authors Level Type Subject Using PhET in High School Chemistry- all my activities in pdf

Models of the Hydrogen Atom - Quantum Mechanics | Hydrogen

Explore molecule shapes by building molecules in 3D! How does molecule shape change with different numbers of bonds and electron pairs? Find out by adding single, double or triple bonds and lone pairs to the central atom. Then, compare the model to real molecules!

This is a simple place value game that several teachers might already know and have taught. It helps to reinforce place value. You can teach students of many levels, since you determine what the highest place value that will be used.

Guided Math: Place Value Game - Cards or Dice

A nuclear weapon is an explosive device that derives its destructive force from nuclear reactions, either fission (fission bomb) or from a combination of fission and fusion reactions (thermonuclear bomb). Both bomb types release large quantities of energy from relatively small amounts of matter. The first test of a fission ("atomic") bomb released an amount of energy approximately equal to ...

Nuclear weapon - Wikipedia

In physics, string theory is a theoretical framework in which the point-like particles of particle physics are replaced by one-dimensional objects called strings. It describes how these strings propagate through space and interact with each other. On distance scales larger than the string scale, a string looks just like an ordinary particle, with its mass, charge, and other properties ...

According to Leadbeater (1927) the Sun sends out several of forms of etheric energy, for example serpent fire, lifeforce and vitality. The lifeforce seems to be capable of occupying several different kinds of etheric form and most commonly it adopts an octahedron, made of four atoms arranged in a square, and one central atom constantly vibrating up and down.
