THE KRIZNER GROUP is a full service law firm that concentrates its practice in assisting organizations both before and after disputes arise. The Firm's preventative services division aids clients in implementing policies and procedures that will help avoid costly lawsuits and other organizational problems before they occur.

Welcome - The Krizner Group

Mineralogy is a subject of geology specializing in the scientific study of chemistry, crystal structure, and physical (including optical) properties of minerals and mineralized artifacts. Specific studies within mineralogy include the processes of mineral origin and formation, classification of minerals, their geographical distribution, as well as their utilization.

Mineralogy - Wikipedia

In chemistry, an ionic compound is a chemical compound composed of ions held together by electrostatic forces termed ionic bonding. The compound is neutral overall, but consists of positively charged ions called cations and negatively charged ions called anions. These can be simple ions such as the sodium (Na^+) and chloride (Cl^-) in sodium chloride, or polyatomic species such as the ammonium ...
