New Criticism. A literary movement that started in the late 1920s and 1930s and originated in reaction to  
traditional criticism that new critics saw as largely concerned with matters extraneous to the text, e.g., with  
the biography or psychology of the author or the work's relationship to literary history.

In analytical chemistry, a calibration curve, also known as a standard curve, is a general method for  
determining the concentration of a substance in an unknown sample by comparing the unknown to a set of  
standard samples of known concentration. A calibration curve is one approach to the problem of instrument  
calibration; other standard approaches may mix the standard into the unknown, giving ...

Cold fusion is a hypothesized type of nuclear reaction that would occur at, or near, room temperature. This is compared with the "hot" fusion which takes place naturally within stars, under immense pressure and at temperatures of millions of degrees, and distinguished from muon-catalyzed fusion. There is currently no accepted theoretical model that would allow cold fusion to occur.
