Imagine a situation where a credit card company has built a fraud detection model using a random forest. The model can classify every transaction as either valid or fraudulent, based on a large number of features. What if, after a transaction is classified as fraudulent, the analyst would like to ...

Microarray analysis techniques are used in interpreting the data generated from experiments on DNA, RNA, and protein microarrays, which allow researchers to investigate the expression state of a large number of genes - in many cases, an organism's entire genome - in a single experiment. [citation needed] Such experiments can generate very large amounts of data, allowing researchers to assess ...

Story. Doing Data Science Exercises Without Data Cleaning and Coding. So as a data scientists/data journalist/information designer, who is about to teach university courses, I asked is it possible to teach an introductory level class that does not require first learning a lot about data cleaning and coding?

### **Doing Data Science - Semanticcommunity.info**

In statistics, exploratory data analysis (EDA) is an approach to analyzing data sets to summarize their main characteristics, often with visual methods. A statistical model can be used or not, but primarily EDA is for seeing what the data can tell us beyond the formal modeling or hypothesis testing task. Exploratory data analysis was promoted by John Tukey to encourage statisticians to explore ...
