Aims: The concept of food security and its association with chronic diseases are both well-established. During the years within the scope of the study, there was a significant increase in the body shape index (ABSI) of Indonesian adults. This study tested the hypothesis that the association between food security and chronic diseases is mediated, in part, by ABSI.

Two organolead halide perovskite nanocrystals, $\text{CH}_3\text{NH}_3\text{PbBr}_3$ and $\text{CH}_3\text{NH}_3\text{PbI}_3$, were found to efficiently sensitize TiO_2 for visible-light conversion in photoelectrochemical cells. When self-assembled on mesoporous TiO_2 films, the nanocrystalline perovskites exhibit strong band-gap absorptions as semiconductors. The $\text{CH}_3\text{NH}_3\text{PbI}_3$ -based photocell with spectral sensitivity of up to 800 ...

Organometal Halide Perovskites as Visible-Light

Glass is a non-crystalline amorphous solid that is often transparent and has widespread practical, technological, and decorative usage in, for example, window panes, tableware, and optoelectronics. The most familiar, and historically the oldest, types of glass are "silicate glasses" based on the chemical compound silica (silicon dioxide, or quartz), the primary constituent of sand.

Glass - Wikipedia

1. Introduction. Patient centric pharmaceutical drug product design may be described as the process of identifying the comprehensive needs of individuals or the target patient population and utilizing the identified needs to design pharmaceutical drug products that provide the best overall benefit to risk profile for that target population over the intended duration of treatment ...

Patient acceptability, safety and access: A balancing act
