Faculty within the Department of Molecular and Comparative Pathobiology conduct research which includes animal models of HIV/AIDS, prenatal stress, atherosclerosis, and neurodegenerative disease.

### **The Department of Molecular & Comparative Pathobiology**

Exercise physiology is the physiology of physical exercise. It is the study of the acute responses and chronic adaptations to exercise. Understanding the effect of exercise involves studying specific changes in muscular, cardiovascular, and neurohumoral systems that lead to changes in functional capacity and strength due to endurance training or strength training.

### **Exercise physiology - Wikipedia**

Anatomy is a fundamental science that studies the structure of the human body from ancient times. Over time, the discipline constantly expands with recent progress that has been produced in researching the human body.
