Cancer is a group of diseases involving abnormal cell growth with the potential to invade or spread to other parts of the body. These contrast with benign tumors, which do not spread to other parts of the body. Possible signs and symptoms include a lump, abnormal bleeding, prolonged cough, unexplained weight loss and a change in bowel movements. While these symptoms may indicate cancer, they ...

Gonane, also known as sterane or cyclopentaperhydrophenanthrene, the simplest steroid and the nucleus of all steroids and sterols, is composed of seventeen carbon atoms in carbon-carbon bonds forming four fused rings in a three-dimensional shape. The three cyclohexane rings (A, B, and C in the first illustration) form the skeleton of a perhydro derivative of phenanthrene.

Aging induces physiological changes in skeletal muscle, including defective mitochondrial energetics, atrophy, loss of strength and power, and insulin resistance. Exercise training is a potent countermeasure to improve glucoregulation by increasing skeletal muscle insulin sensitivity and mitochondrial respiratory capacity and warding off aging muscle atrophy.
