Shoji Screen (art + social studies) Japanese homes have walls that are very different from those in the United States. In Japan, many doors and interior walls are actually large, movable screens, called Shoji Screens. They are constructed of thin wooden strips and very strong Shoji paper, which is made from very thin, very strong mulberry fibers.

Shoji Screen - cdn.dick-blick.com

of my business entails the making of shoji and to this end it is a Western- red cedar, however, most timbers

are suitable providing they are stable and relatively straight grained. I make shoji in two basic parts, the frame and the latticework or kumiko (see diagram). This method of construction allows the paper to more closely resemble shoji in Japan.
