### **Corrosion Control by Modern Weld Overlay Technology**

Control theory in control systems engineering deals with the control of continuously operating dynamical systems in engineered processes and machines. The objective is to develop a control model for controlling such systems using a control action in an optimum manner without delay or overshoot and ensuring control stability.. To do this, a controller with the requisite corrective behaviour is ...

### **Basics of Power System Control and Protection**

Instrumentation and control is a field applicable to many sectors of industry. It enables efficient and safe automatic control of large-scale continuous processes including nuclear power stations, oil refineries and chemical plants down to smaller batch operations such as manufacturing centres, breweries and other food production facilities.
