Physics Project Report on Polarisation of Light Introduction towards Project Report Polarisation - Light is a transverse wave consisting of vibrations normal to the direction of propagation. The lack of symmetry of vibration around the direction of wave propagation is called polarisation.

Physics Project Report on Polarisation of Light

Polarisation of light is one of the unique and most significant properties shown by light waves. In this project report, we shall study in details about the polarisation of light. Theory of Polarised Light . Plane Polarised Light - A plane polarised light is that in which vibrations are confined only to one direction.
