where \ln is the natural logarithm. The entropy is non-negative and is at most the natural log of the number of elements in X. Entropy is a fundamental concept in information theory: in the paper that originated that field, Shannon (1948) described entropy as "a measure of how much "choice" is involved in the selection of an event". Thus a distribution with higher entropy involves ...

Maximum entropy modeling of species geographic

Research comprises "creative and systematic work undertaken to increase the stock of knowledge, including knowledge of humans, culture and society, and the use of this stock of knowledge to devise new applications." It is used to establish or confirm facts, reaffirm the results of previous work, solve new or existing problems, support theorems, or develop new theories.

Reflection seismology (or seismic reflection) is a method of exploration geophysics that uses the principles of seismology to estimate the properties of the Earth's subsurface from reflected seismic waves. The method requires a controlled seismic source of energy, such as dynamite or Tovex blast, a specialized air gun or a seismic vibrator, commonly known by the trademark name Vibroseis.

Reflection seismology - Wikipedia
