21.06.2005 A biometric system can be viewed as a pattern recognition system consisting of three main modules: the sensor module, the feature extraction module and the feature matching module. The design of such a system is studied in the context of many commonly used biometric modalities - fingerprint, face, speech, hand, iris.

2008-2018. Polyman for MS-Windows 10 and older checks EDF(+) compatibility of your files and shows their signals, scorings and other annotations, and any video data. It offers several automatic EEG/EMG analyses and manual sleep scoring. It comes with demo PSG's, video and scorings.

EDF downloads - European Data Format

Rune, What I am looking for is exactly what the mathematical operation is I would be doing in excel, for example if my data is in columns A and B, rows 1 through 100 (say A is time and B is the signal), how would I calculate a low pass filter of a certain cutoff frequency.

comp.dsp | How to calculate a filter in excel

The problem of "spectral inversion" comes up fairly frequently in the context of signal processing for communication systems. In short, "spectral inversion" is the reversal of the orientation of the signal bandwidth with respect to the carrier frequency.

Handling Spectral Inversion in Baseband Processing - Eric

A tone is a sound which is produced by a regular vibration. So it has only one frequency even though intensity/amplitude can vary. A Loudspeaker is an electronic transducer which converts electric signals to pressure variations to make the sensation of sound.

A 4th-generation programming language (4GL) or (procedural language) is any computer programming language that belongs to a class of languages envisioned as an advancement upon third-generation programming languages (3GL). Each of the programming language generations aims to provide a higher level of abstraction of the internal computer hardware details, making the language more programmer ...

The interior of a 3-D MEMS Gyroscope Sensor is intricate and tiny (this structure is only about 0.08 cm wide). My last two blog entries discussed demonstrations of gyroscopes and angular momentum conservation at our school's science fair.
