A leg is a weight bearing and locomotive anatomical structure, usually having a columnar shape. During locomotion, legs function as "extensible struts". The combination of movements at all joints can be modeled as a single, linear element capable of changing length and rotating about an omnidirectional "hip" joint.

History. As its name suggests, the English language began in England. Germanic tribes (Saxons, Angles, and Jutes) came to Britain from around 449 AD.They made their home in the south and east of the island, pushing out the Celtic Britons who were there before them, or making them speak the English language instead of the old Celtic languages.Some people still speak Celtic languages today, in ...
