

### **statistical inference course notes pdf**

Statistical inference is the process of using data analysis to deduce properties of an underlying probability distribution. Inferential statistical analysis infers properties of a population, for example by testing hypotheses and deriving estimates. It is assumed that the observed data set is sampled from a larger population.. Inferential statistics can be contrasted with descriptive statistics.

About this book. This book is written as a companion book to the Statistical Inference Coursera class as part of the Data Science Specialization. However, if you do not take the class, the book mostly stands on its own. A useful component of the book is a series of YouTube videos that comprise the Coursera class.

3. Introduction to Statistical Learning Theory This is where our "deep study" of machine learning begins. We introduce some of the core building blocks and concepts that we will use throughout the remainder of this course: input space, action space, outcome space, prediction functions, loss functions, and hypothesis spaces.
