In the decade that has passed since the terrorist attacks of Sept. 11, 2001, security has taken on an increasingly more significant role in the global supply chain.

### **Scrutinizing Supply Chain Security - Inbound Logistics**

A supply chain attack is a cyber-attack that seeks to damage an organization by targeting less-secure elements in the supply network. A supply chain attack can occur in any industry, from the financial sector, oil industry or government sector. Cybercriminals typically tamper with the manufacturing process of a product by installing a rootkit or hardware-based spying components.
