A Navier and Stokes Equations Try. Authors: Thomas Pierre Nicolas Jean Brouard Comments: 6 Pages. Here is proposed a solving Navier and Stokes equations three dimensions fluid model problem, described in cylindrical coordinates, composed of null radial and vertical velocities, and of a cross-radial velocity.

In this comment we address the preprint of Jha and Hirata (arXiv:1809.10316 [physics.chem-ph]) which claims "Numerical Evidence Falsifying Finite-Temperature Many-Body Perturbation Theory." We agree that finite difference differentiation of the exact grand potential is the correct way to verify the terms in the perturbation expansion.

In particle physics, a generation or family is a division of the elementary particles. Between generations, particles differ by their flavour quantum number and mass, but their interactions are identical.. There are three generations according to the Standard Model of particle physics. Each generation is divided into two types of leptons and two types of quarks.

Physics (from Ancient Greek:  $\varphi\upsilon\sigma\iota\kappa\acute{\alpha}$  ( $\varphi$  "knowledge of nature", from  $\varphi\iota\varsigma$ ,  $\varphi\acute{\iota}\varsigma$  "nature") is the natural science that studies matter and its motion and behavior through space and time and that studies the related entities of energy and force. Physics is one of the most fundamental scientific disciplines, and its main goal is ...

The noncommutativity of the momentum components, arising from spacetime torsion coupled to spin, replaces the integration over the momentum in loop Feynman diagrams with the summation over the momentum eigenvalues.

This book is designed to give a background on the origins and development of Wigner functions, as well as its mathematical underpinnings. Along the way the authors emphasise the connections, and differences, from the more popular non-equilibrium Green's function approaches.

I'm aiming to encourage people to think carefully about what he is telling them. I'm not out to discourage people from trying out any promising new ideas – what I want is to help people question what's out there for themselves.
