Ecology (from Greek:  $\acute{\alpha}\lambda\theta\acute{\iota}\nu\omicron\varsigma$ , "house", or "environment";  $\sigma\upsilon\lambda\lambda\acute{\alpha}\beta\eta\varsigma$ , "study of") is the branch of biology which studies the interactions among organisms and their environment. Objects of study include interactions of organisms with each other and with abiotic components of their environment. Topics of interest include the biodiversity, distribution, biomass, and populations of organisms ...

EER focuses on the overlap between ecology and evolution. Abstracts of all EER articles are indexed in Google Scholar.

### **Evolutionary Ecology Research " a scientific journal**

Description: Journal of Ecology publishes original research papers on all aspects of the ecology of plants (including algae), in both aquatic and terrestrial ecosystems. Studies of plant communities, populations or individual species are accepted, as well as studies of the interactions between plants and animals, fungi or bacteria, providing they focus on the ecology of the plants.

### **Journal of Ecology on JSTOR**

Description: Journal of Applied Ecology publishes novel papers that apply ecological concepts, theories, models and methods to the management of biological resources in their widest sense. The editors encourage contributions that use applied ecological problems to test and develop basic ecological theory, although there must be clear potential for improving management.

The biomass is the mass of living biological organisms in a given area or ecosystem at a given time. Biomass can refer to species biomass, which is the mass of one or more species, or to community biomass, which is the mass of all species in the community. It can include microorganisms, plants or animals. The mass can be expressed as the average mass per unit area, or as the total mass in the ...
