

the triune brain in pdf

The triune brain is a model of the evolution of the vertebrate forebrain and behavior, proposed by the American physician and neuroscientist Paul D. MacLean. MacLean originally formulated his model in the 1960s and propounded it at length in his 1990 book The Triune Brain in Evolution. The triune brain consists of the reptilian complex, the paleomammalian complex (limbic system), and the ...

Anonymous said... great post, thank you! there are many articles on parents shouting at children with little information to be found if the situation is reversed so this has helped me lots.

advice for parents: what to do when your child yells at you

The use of entheogens such as ayahuasca is exemplary of the long and ongoing tradition in many cultures to employ psychoactives as tools that stimulate foundational types of understanding. That such substances are capable of stimulating profoundly transcendent experiences is evident from both the academic literature and anecdotal reports. This article attempts to present these concepts in such ...
