I purchased this pump in September of 2016. The pump is controlled by a float switch and is used to feed a 1/4 acre pond that leaks. So the pump runs about 70% of the time, as the water level fluctuates.

Hi Nasir, You can try to use VFD or inverter to drive your submersible pump. The inverter input power supply is single phase 240V and it will convert to 3 phase output to your motor. But please consider your Inverter current (ampere) rating same rated or higher than motor FLA. Rule of thumb to sizing your inverter is $\hat{\epsilon}$ FLA x 2 = VFD current rating.
