Complexity characterises the behaviour of a system or model whose components interact in multiple ways and follow local rules, meaning there is no reasonable higher instruction to define the various possible interactions.. The term is generally used to characterize something with many parts where those parts interact with each other in multiple ways, culminating in a higher order of emergence ...

I've always considered myself non-confrontational and have done my best to avoid conflict. In researching ways to teach kids conflict resolution skills, I've discovered that avoidance is actually a choice on the "Conflict Resolution Wheel." I'm primarily a "walk away" or "go play with somebody else" conflict resolver. And, perhaps because I try to "use [!]

This paper suggests that working politically in a developmental context means directing attention and support to the agents of reform and development (leaders and organisations). This allows investment in the local processes that will resolve problems – such as problems of collective action – through the work of alliances and coalitions.
